PROFILE

I am a graduate of an Associate Degree in Information Management from Politeknik Negeri Malang, with hands-on industry experience as a Fullstack Developer at CV Agsatu. In this role, I was responsible for developing various projects, including a Smart Dashboard for monitoring regional tax management, aimed at enhancing transparency and efficiency. Additionally, I actively participated in the Student Creativity Program as an Android Developer, where I developed an application to monitor water turbidity in catfish ponds. Through this project, I successfully integrated relevant technology to deliver practical and beneficial solutions for the community.

INTERNSHIP EXPERIENCE

CV. Agsatu - Full Stack Developer February 2024 - June 2024

- Created tables aligned with the desired business workflow and adjusted them to match server data, as well as created views to simplify data display.
- Ensured that the numbers displayed in charts aligned with the expected values based on calculations defined in the system.
- Implemented ETL for regional tax data by extracting data from BPHTB, PBB, and PDL databases, transforming it to fit warehouse requirements, cleansing it, and loading it into the data warehouse on a scheduled or real-time basis, with options for manual and automatic data retrieval.

PT. Cendana Teknika Utama - Odoo Developer July 2023 - August 2023

- Conducted comprehensive testing on the SimKlinik website, covering functionalities such as doctor and patient data entry, scheduling, and generating examination results to ensure all features worked according to specifications.
- Compiled a detailed testing report for the SimKlinik website in Excel format, including a list of tested features, testing methods used, and detailed results for each feature.
- Developed a laundry management website with two main user roles: Cashier, responsible for recording laundry check-in and check-out and processing payments, and Admin, responsible for accessing revenue statistics and monitoring laundry flow in real-time to support effective operational management.

EDUCATION

State Polytechnic of Malang
Informatics Management 2021 - 2024
GPA. 3.79

PROJECT

Designing a Smart Dashboard for Regional Taxes in Madiun City April 2024 - June 2024

- Developing a website using Laravel with PHP.
- Designing the website layout using Bootstrap.
- Creating queries for the developed features.

Web-Based Complaint Management Information System. October 2023 - November 2023

- Developed a website using Laravel with php.
- Created an architectural model for the database.
- Designed the application system flow.

Cash Register System for Bahagia Laundry with Odoo 16.

July 2023 - August 2023

- Developed a website using Odoo 16 with Python.
- Created an architectural model for the database.
- Designed the application system flow.
